## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The patent term adjustment to date is 234 days. If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the term adjustment will be 234 days.

If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system. (<http://pair.uspto.gov>)

Any questions regarding the patent term extension or adjustment determination should be directed to the Office of Patent Legal Administration at (703)305-1383.

## Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

## DETAILED ACTION

### *Allowable Subject Matter*

1. Claim 45 is allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest a method of biological burden reduction, comprising the step of applying a continuous stream of O<sub>x</sub> gas to a material in a sealed biological burden reduction chamber, wherein a temperature in the chamber is maintained at about 45° C to 60° C, wherein the continuous stream of O<sub>x</sub> gas is drawn into, through and out of the chamber simultaneously throughout the process, and wherein the O<sub>x</sub> gas comprises between about 3 and 6% O<sub>3</sub> and about 1 and 10% CO<sub>2</sub>.

The closest prior art to the applicant's claimed invention is U.S. Pat. 5,011,699 to Mitsuda et al. and U.S. Pat. 5,241,803 to Griffin.

Mitsuda et al. disclose a process for sterilizing foodstuffs. The foodstuffs are sterilized in a processing room, packing receptacles or a refrigerator with the aid of a mixture of O<sub>3</sub> gas and CO<sub>2</sub> gas. The device comprises a gas feed apparatus for feeding a mixture into the processing room or refrigerator and a gas control device for maintaining a fixed mixing ratio of O<sub>3</sub> gas to CO<sub>2</sub> gas. The examples teach O<sub>3</sub> concentrations of 50%, 33%, 66% and 75% with the remaining gas being CO<sub>2</sub>. The reference fails to teach a gas composition comprising between about 3 and 6% O<sub>3</sub> and about 1 and 10% CO<sub>2</sub>.

Griffin teaches a method of ozone sterilization wherein ozone gas is used to sterilize a product. The method is for sterilizing a product for use in a medical treatment. The method comprises charging the product in an open sealable package and then treating the package in an enclosed container with an ozone atmosphere having a temperature not higher than 100° F (37° C). The ozone gas used is preferably diluted O<sub>3</sub> with a concentration less than 25%, most preferably about 2 to 6%. A gas used for diluting makes up the remainder of the composition and is selected from a group of inert gases including CO<sub>2</sub>. This reference also fails to teach a CO<sub>2</sub> concentration of about 1 and 10% and also does not teach a chamber temperature in the range of 45° C to 60° C.

Neither of these two references alone or in combination teach or suggest the applicants claimed ozone and carbon dioxide concentrations present in the gaseous mixture used for biological burden reduction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
